CAPTAIN CANOT A UTHOR OF THE GREAT BOOK JUST BE-ING PUBLISHED, SPEAKS OF HAMPTON'S

GREAT CURE OF RESUMATISM CONTRACTED UNDER TROPICAL CLIMATES. BALFIMORE, Md., June 4, 1864. Mr. Blockbridge, of the Fountain Hotel, Light street,

Dear Sir: Being on the point of leaving the city, avail myself of a few idle moments to thank you kindly for the medicine you sent me, and which has restored me to the use of my limbs. I beg you to send me four bottles more, to carry on my voyage. Since I had the fortune to use Dr. Hampton's Vegetable Tincture my confidence is so strong that, in gratitude o the proprietors of said medicine, I beg you to present my respects to them, and induce them to make it more publicly known as a sure Rheumatic cure. Having called on me on the 19th of April last, and seen me prostrated on my bed, aselees in all my li ubs, you can appreciate nearly as well as myself the prompt relief I received from Dr. Hampton's Tincture, and I am positive had it not been for your strong and forcible recommendations I should still have been in bed.

It is really a pity this specific should not be approved by medical men, and like all patent drugs it should suffer the imputation the public generally give to suce preparations. I myself, who was all ways epposed to a patented specific, took this medicine with reluctance, and without confidence in it. and it was only through your disinterested, friendly recommendations, and my critical situation that induced me to try this really beneficial Vegetable Incture.

You may inform Messrs. Mortimer & Mowbray that they are at liberty to make use of my name in the support of the good effects of Dr. Hampton's Vegetable Tincture, as it has cured me in five weeks of a chronic Inflammatory Rheumatism, contracted under tropical climates, and of seven years' periodical duration. I have only used three bottles, and find that even the deformed parts of my hands are fast

eturning o their former natural appearance I have been under the treatment of several phyicians in London and Paris, without any apparent benefit; also, while in New York, having tried the Phompsonian and Homopathic remedies, after having been tormented with galvanic be teries, cold and aromatic baths, and hundreds of internal and external medicines, all to no effect, I am, so far, cured by this Hampton's Vege able Tineture only. Therefore, my dear sir, accept of the assurance of my gratitude, and believe me your well wisher. THOMAS CANOZ.

EVENING STAR.

THE WEIGHT OF BESAD.

TO THE EDITORS OF THE EVENING STAR We saw in the Star of Saturday, 14th instant, under the head of "Local Items," a statement that some loaves of bread had been taken away from the bakers on account of their being too heavy; whereupon a baker (Havenner) has commenced a process of law against the Corporation, in order to recover damages and test the soundness of the law. As regards the question of validity, in its being given, we understand, by some lawyer, to the Boss Bakers' Society

pursue, in the present emergency, would be the wrath of the Almighty. to get up a general petition, signed by the citizens, asking for a repeal of the law, as most of them think, as far as our observation has gone, that it is a very objectionable law. It is his hands as a trust, not in reference to the constitutionality of the law that we wish to make a few suggestions. but in reference to its general features. It has been stated that the construction which the Corporation Attorney has put upon the law as not the same which was intended by some who voted for it. The law should have been more explicit, if the Corporation Attorney is not correct. If, in the law, the eight, sixteen, and thirty-two ounces is more in the half-loaf, loaf, and double-loaf than wa intended, they should have embodied the word 'more" in the law.

The amendment that is contemplated will have little effect in doing away with the objections of the law, in our judgment. We me, now, to comment on the features of the

The most difficult matter is this: to regulate the price of bread so as to give the bakers a lic that he has opened a Shop at the corner C yet the enormous profit the bakers will have, gerous, and was told that it was, them in selling their bread for a small profit To illustrate the subject: Take the present rate of flour, \$9 50 per barrel for extra super me I never had any." ewels, and regalia for Free Masons, Odd Fellows, fine, and the price of five cents per loaf, which is near the actual cost, according to our opinion from the close calculation we have made If flou: advances \$1 on the barrel, the bakers will be compelled to raise the price of bread. say to six and a quarter cents per losf This will give those bakers who are baking three barrels of flour per day the profit of at least \$6. in addition to the profit they are receiving at present, if any. The cent or cent and a quarter's difference in adding or deducting from the present price makes a considerable item when calculated on seven or eight hundred loaves of bread. In a communication. hereafter, we may discuss the justness of legislating on the subject of a law to regulate the weight of bread, and endeavor to review some remarks on an article published in the Nation- | me al Intelligencer some few weeks ago.

Old Proverbs.

Hoffman Von Fallersleben has "Ancient Netherland Proverbs from the oldest collecion." This oldest collection of proverbs was

printed about the beginning of the fifteenth century, without date or place of publication, with the title-"Incipiunt prouerbia seriosa n theutonico prima deinde in latina sibi inuicem constantia indicio colligentis pulcherrima se in hominum colloquiis communia." Of hese proverbs we cull at random : When one hand washes the other, both are

How to BURN COAL .- Graham's Magazine has an article on coal buying and burning, from which we select the following :

"The great mistake of all is to put on too much coal, as if it were wood—the greater the quantity the greater the heat. If too much coal is applied, the combustion is necessarily imperfect, because the fire is necessarily ohecked up," the draught destroyed and the elements of the coal slowly escaping from it, pass off to the chimney unconsumed, or are disseminated in gasses through the room. Whereas if the strata of coal be but moderate, a red flame will play around the interior of the stove, by which entire combustion and a healthy heat are secured. One ton of coal, therefore, by thorough combustion, will often secure more heat, and a healthier atmosphere, than two tons secured in the ordinary way; and this is a fact which can easily be demon-

It will be very important, this winter especially, to have attention paid to this rule.
